

Anyone that insists on making you shoot him in order to get him to stop whatever it is he's doing is considered a "Zombie" because of their seemingly senseless behavior. The phenomenon of "Zombies" attacking ordinary folks in and around their homes has given rise to a popular type of shotgun that we like to call the "Zombie Special." Here's one we just completed for Dave H. Have a look.

This is one of a variety of guns built on the Browning A5 pattern. This one has been modified into an 8-shot tool with specialized amenities just for Zombie Busting.

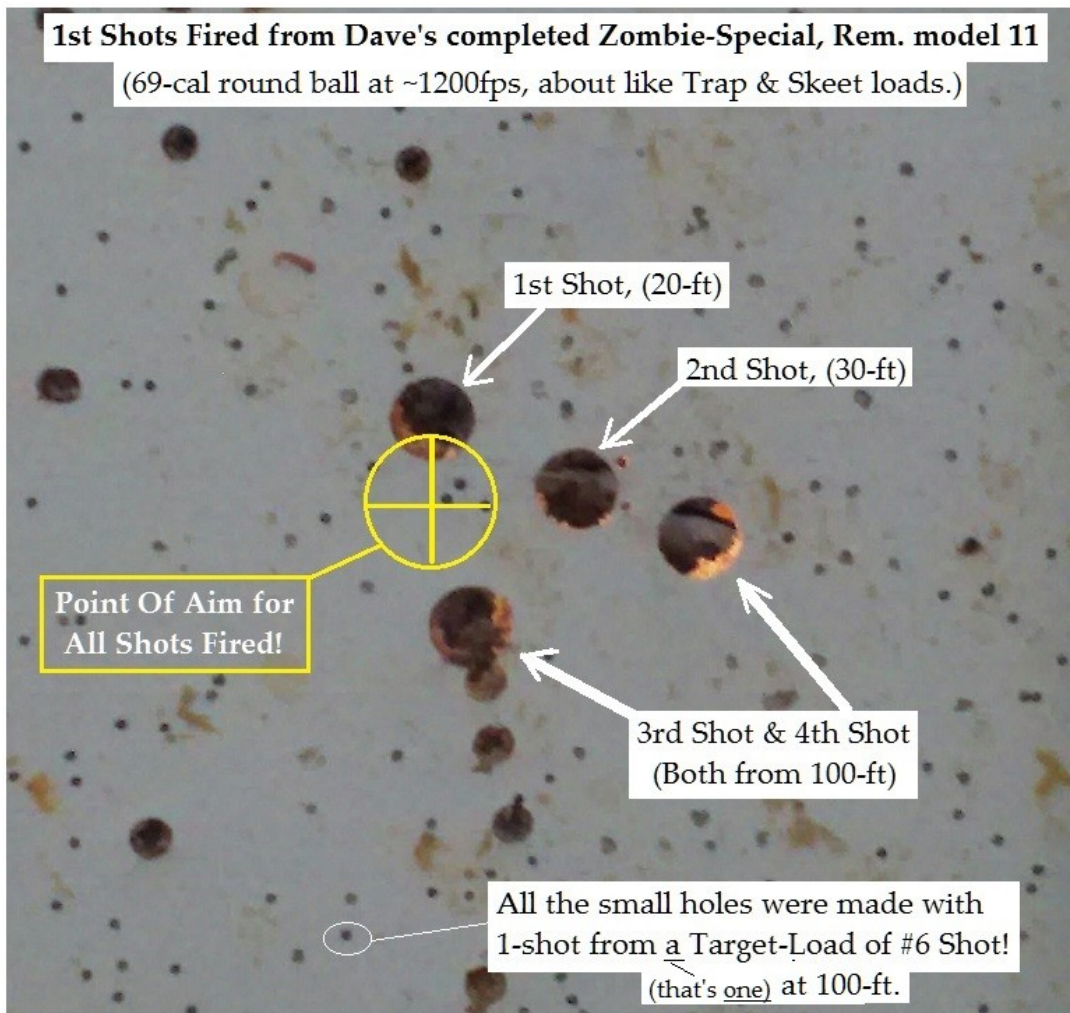

The groove in the Picatinny Rail becomes the rear sight for regular use. Front sight is a "Big-Dot" w/Tritium (from XS Sights.) It's "on" at 100-ft. Zombies had best steer clear!

The targets below make it clear that this is a serious Zombie-Busting tool!

This board is 16" wide.

These 2 "holes were made with 1-shot each at 20-ft using the same Trap & Skeet loads as in the other photo.

These holes can be covered by your hand which means...

You Must AIM Each & EVERY Shot when shooting at real-world Zombie-Busting distances, (like inside your house!)

**SMOKEY THE BEAR SAYS**

**ONLY YOU...  
CAN RETURN FIRE.  
BE PREPARED!**
